LABORATORY RECORD

Course: Full Stack Web Development
Course Code: 23CM4121
Experiment No.: 1
Student Name: D. Suswetha
Roll No.: A24126552079
Date: 30-08-2026

---

1. TITLE

Design and Implementation of Static College Webpage Using HTML5 Formatting, Tables, Lists, and Forms

---

2. AIM

To develop a static college webpage for ABC Engineering College utilizing HTML5 text formatting tags, superscripts, subscripts, lists, structured tables, hyperlinks, images, and contact form inputs.

---

3. OBJECTIVE

The objectives of this experiment are:

- To practice document structuring with HTML5.
- To apply text formatting tags (bold, italic, underline, sup, sub).
- To construct ordered and unordered lists for academic courses and facilities.
- To create structured tables displaying student academic details.
- To implement a contact form with text, email, gender radio buttons, and submit action.

---

4. THEORY

HTML5 is the backbone of web development. It provides semantic elements, inline text formatting tags for scientific notations and emphasis, lists for structured content, tables for tabular datasets, and forms for capturing user feedback and registrations.

Application Flow:
HTML5 Structure -> Text Formatting & Lists -> Student Table -> Image & Links -> Contact Form

---

5. ALGORITHM / PROCEDURE

1. Create an HTML5 document with title 'Static Webpage'.
2. Display college heading and introductory paragraph with bold, italic, and underline tags.
3. Format chemical formula (H■O) and mathematical formula (X^2) using sub and sup.
4. Build an ordered list (<ol>) for courses and an unordered list (<ul>) for facilities.
5. Construct a border table with headers: Roll No, Name, Branch, and populate rows.
6. Embed an image tag and an external hyperlink with target='_blank'.
7. Implement a contact form containing name, email, gender radio buttons, and a submit button.
8. Verify web page rendering and form inputs in browser.

6. PROGRAM

index.html

```
<!DOCTYPE html>
<html>
<head>
    <title>Static Webpage</title>
</head>

<body>     <h1>ABC Engineering

College</h1>

    <p>         Welcome to our <b>College
Website</b>.
        We provide <i>Quality Education</i> in
<u>Engineering</u>.
    </p>

    <p>
        Formula: X<sup>2</sup><br>
        Water: H<sub>2</sub>O
    </p>

    <h2>Courses</h2>

    <ol>
        <li>CSE</li>
        <li>ECE</li>
        <li>EEE</li>
    </ol>

    <h2>Facilities</h2>

    <ul>
        <li>Library</li>
        <li>Hostel</li>
        <li>Sports</li>
    </ul>

    <h2>Student Details</h2>

    <table border="1">
        <tr>
            <th>Roll No</th>
            <th>Name</th>
            <th>Branch</th>
        </tr>

        <tr>
            <td>101</td>
            <td>suresh</td>
            <td>CSE</td>
        </tr>

        <tr>
            <td>102</td>
            <td>Rahul</td>
            <td>ECE</td>
        </tr>
    </table>

    <br>     <img src="college_logo.png" alt="College Logo"

width="150">

    <br><br>     <a href="https://www.google.com" target="_blank">Visit

Google</a>

    <hr>

    <h2>Contact Form</h2>
```

```
    <form>

        Name:
        <input type="text"><br><br>

        Email:
        <input type="email"><br><br>

        Gender:
        <input type="radio" name="gender"> Male
        <input type="radio" name="gender"> Female

        <br><br>         <input type="submit"

value="Submit">

    </form>

</body>
</html>
```

7. CODE EXPLANATION

Code / Syntax	Explanation
<b>, <i>, <u>	Applies bold, italic, and underline styling to text.
<sup>, <sub>	Renders text above (superscript X^2) or below (subscript H■O) normal baseline.
, ,	Creates numbered and bulleted lists for courses and campus facilities.
<table border='1'>	Defines a structured table with visible cell borders.
<input type='radio' name='gender'>	Radio button group ensuring mutual exclusivity of gender choice.
<a href='...' target='_blank'>	Hyperlink opening destination URL in a new browser tab.

8. TEST CASES AND EXECUTION DATA

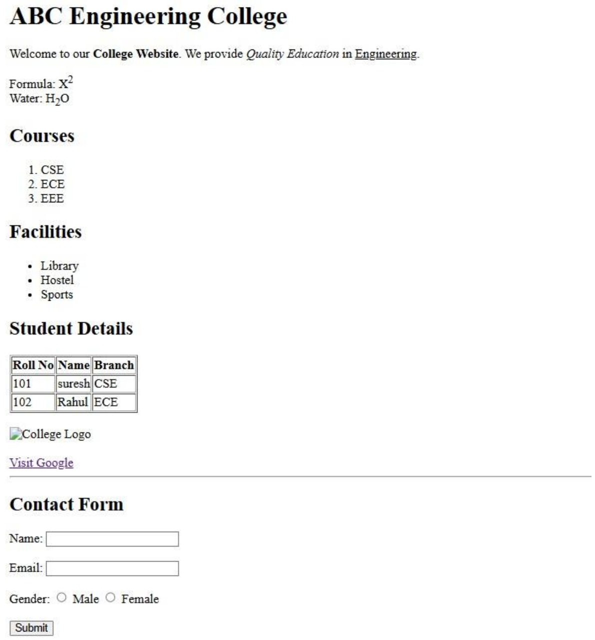
The experiment was executed with the following test cases to verify functionality:

Test Case	Input / Action	Expected Result	Actual Result	Status
TC-01	Heading & Formatting	Inspect college description	Bold, italic, and underline styles render correctly	**Pass**
TC-02	Formulas Rendering	Check formulas	X^2 and H■O render with sup and sub	**Pass**
TC-03	Courses & Facilities Lists	Check lists section	Courses displayed as 1,2,3; Facilities as bullet points	**Pass**
TC-04	Student Details Table	Inspect table structure	Table displays Roll No, Name, Branch rows	**Pass**

TC-05	Contact Form	Fill form & Submit	Form inputs accept text, email, and radio selection	**Pass**

9. OUTPUT

Output 1: Static College Webpage with Formatting, Lists, Table and Contact Form



10. RESULT

Thus, the static college webpage demonstrating HTML5 formatting, lists, tables, and contact form was successfully designed, implemented, and verified.
